

PAWSITIVE LIFE - User Guide

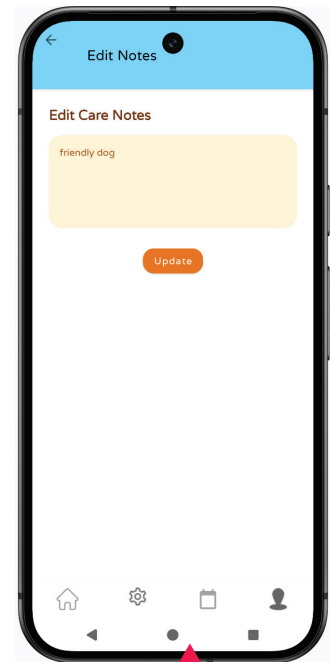

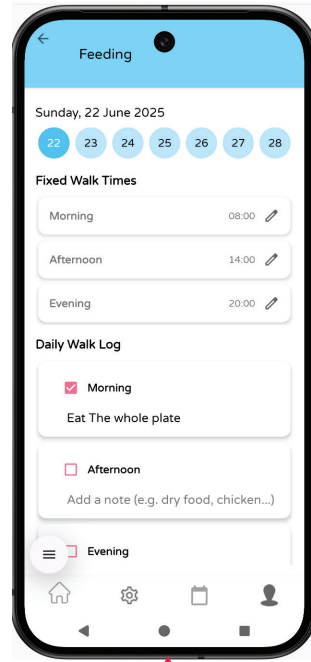

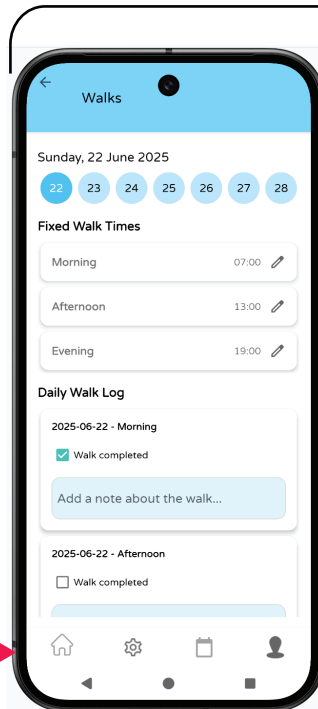

Dog Profile Screen

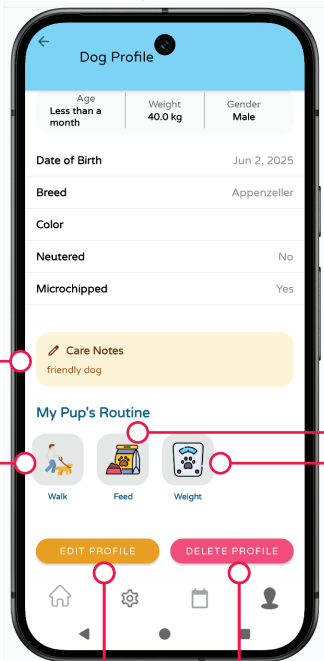

In these screens, the user can set fixed feeding/walking times for their dog, mark them as completed, and add notes.

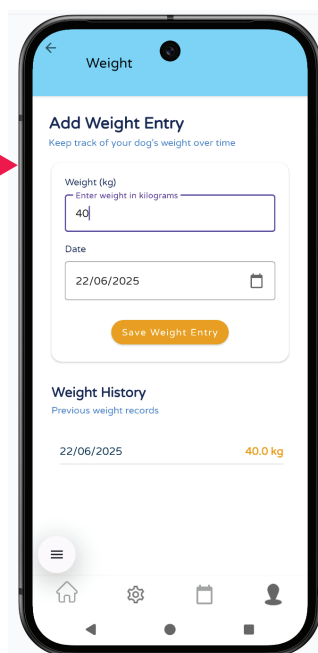

In this screen, the user can edit the dog's free-text notes. When they tap **Update**, the notes will be saved and updated in the dog's profile.

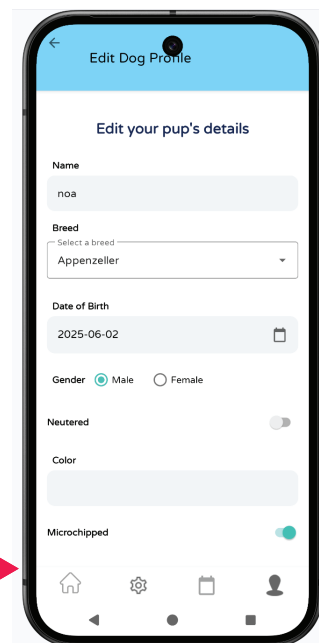

The bottom section of the Dog Profile screen

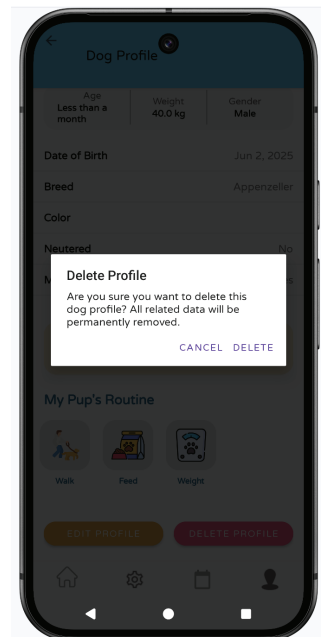

Weight Tracking – When a new weight is added, the dog's profile is updated, and the new weight is added to the list of weight entries at the bottom of this screen.

By tapping the Edit Profile button, the user can edit the dog's details.

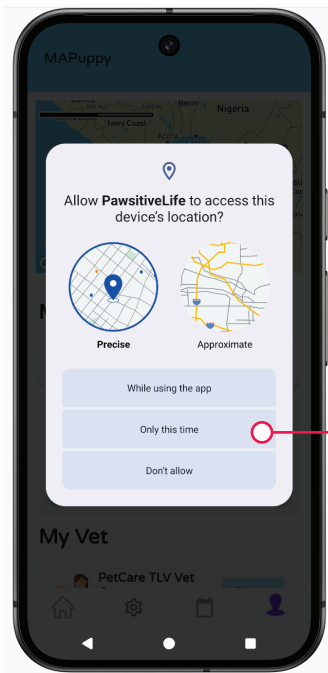

By tapping the Delete Profile button, a dialog appears to confirm the deletion of the dog's profile. This action is permanent and cannot be undone.

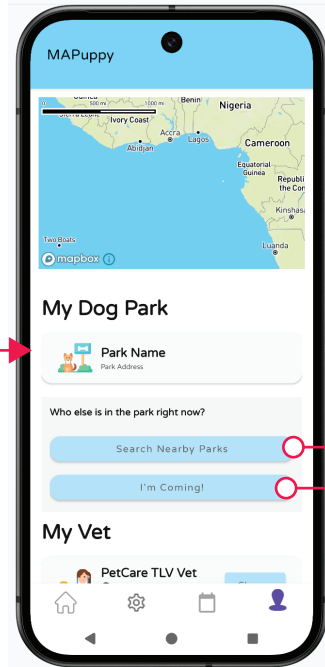

MAPuppy Screen

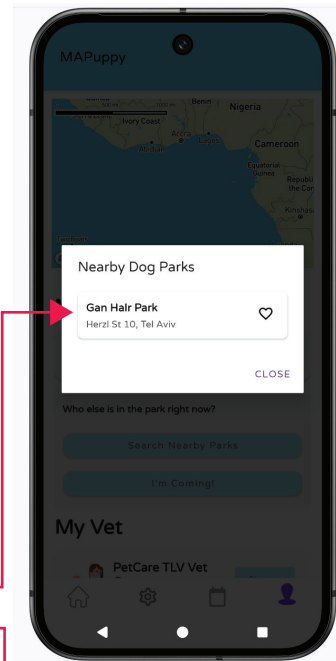

When the user taps the map icon in the bottom menu, they are taken to the Map screen, where they are first prompted to grant location access permissions.

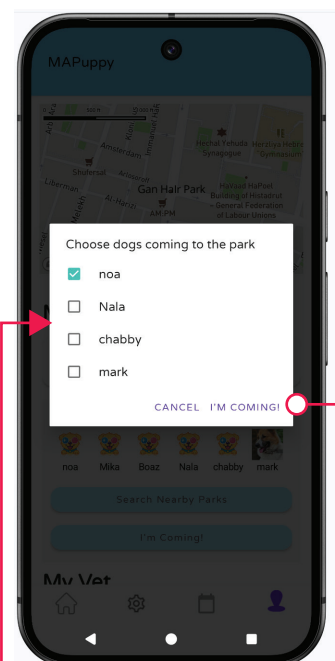

By tapping this button, a dialog opens with a list of nearby dog parks. The user can select a park and set it as their favorite.

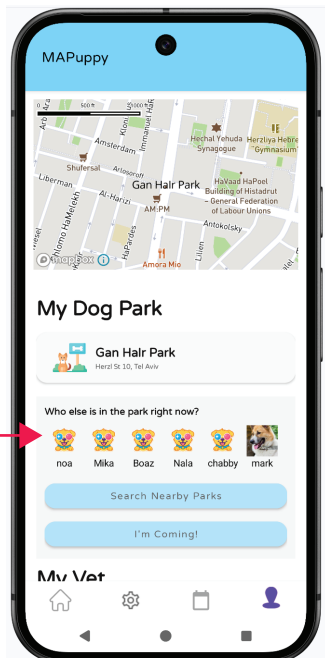

The selected dog park details will be updated on the Map screen.

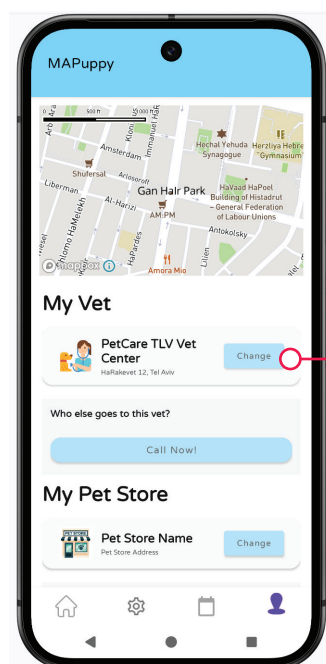

By tapping this button, a dialog opens allowing the user to select one or more dogs from their list to mark as attending the selected dog park.

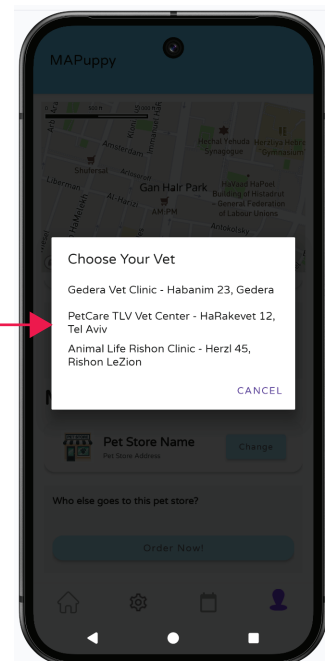

After confirming attendance, the list of dogs going to the selected dog park is updated. The user can view other users' dogs that have also been marked as attending the park.

The bottom section of the Map screen.

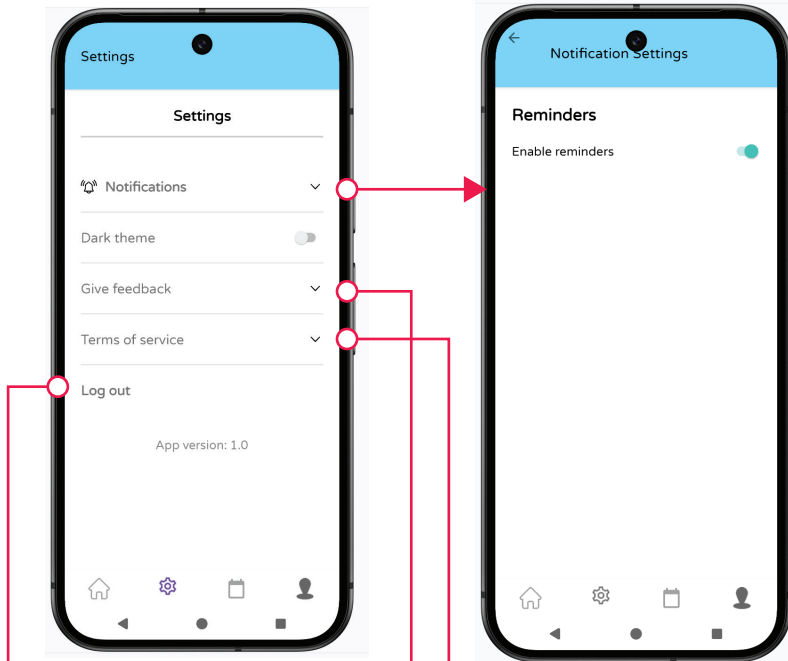

By tapping this button, a dialog opens with a list of nearby veterinarians. The user can select a veterinarian, and their details will be updated on the Map screen, along with an option to call the selected vet.

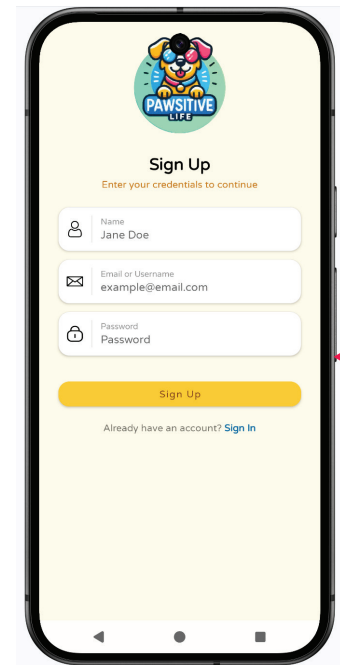

Similarly, for nearby pet stores, tapping the button opens a dialog with a list of nearby stores. The user can select a store, and its details will be updated on the Map screen, along with an option to call the selected store.

Settings Screen

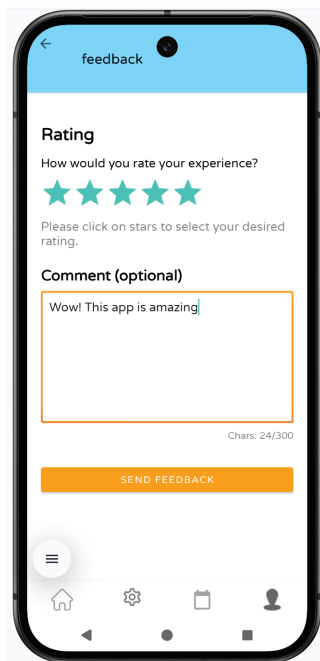

The user can either allow or deny permission to receive notifications from the app.

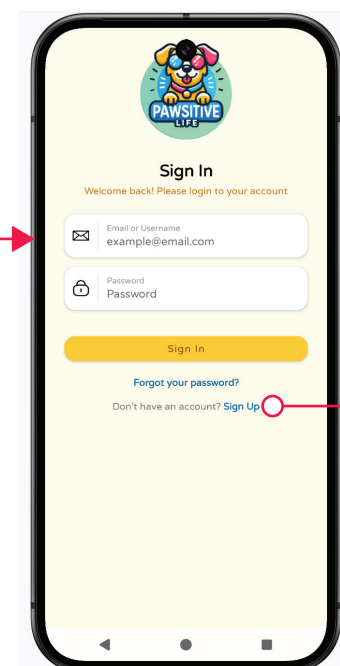

Sign up Screen

The user can rate the app and write a review.

Sign in Screen

When the user taps **Sign Out**, they are redirected back to the login screen. If the user is not registered, tapping **Sign Up** will take them to the registration screen.
